

O River Construction

O River Construction is a general construction business that has been established since 1995 servicing many communities within the Bay Area.

We are certified contractors and work with licensed subcontractors who, along with our company, have the knowledge and skills to effectively and efficiently build out and rehab any type of home (single family, multi-family, apartments, condominiums, townhomes, duplex, etc.).

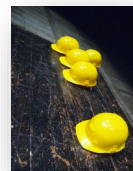

Transparency is part of our mission statement. We are clear about the cost, scope, and length of a project, and open about any issues that arise during the course of the job.

Services

O RIVER CONSTRUCTION

We are dedicated to exceeding our customer's expectations for quality, timeliness, and value while maintaining a high standard of safety and performance.

Oscar Valdez, Owner

SEISMIC RETROFIT

Many commercial buildings constructed before 1987 are not considered capable of resisting the forces exerted by an earthquake.

Living in earthquake territory, it is widely understood that certain types of older buildings are inherently dangerous as they are susceptible to structural damage, or even collapse, in the event of an earthquake. **O River Construction** takes pride in quality retrofitting.
